Comfizz
Innovative Medical Clothing

WE'VE GOT YOU **COVERED**

SUPPORTING YOU ALL DAY EVERY DAY

Where it all began...

Meet Ernie, the Grandad of Comfizz. He is the reason Comfizz support wear exists. When Ernie had his ostomy surgery in 2004 nothing like Comfizz existed on the market.

That's when his daughter and son in-law (who at the time had a business producing high performance sportswear) developed a solution applying their expertise and knowledge to solve the issues faced when living with a stoma.

Comfizz Mission

“To continue developing innovative, comfortable support garments in a shared effort with healthcare professionals and users”.

Our garments will always be extra comfortable, functional and stylish so you feel good wearing them.

WHY YOU NEED SUPPORT WEAR

CLINICAL TRIAL
SHOWS THAT

COMFIZZ
SUPPORT WEAR

CAN DRAMATICALLY
REDUCE HERNIA RISK

Hernia Prevention

Light to medium support wear can replace regular underwear to help reduce risk of a hernia.

Hernia Management

Firmer support wear is ideal for managing existing hernias, making life more comfortable often relieving the need for surgical repair.

Comfort

Comfizz are THE most comfortable support wear out there with breathable, stretch, seamless and soft fabric. You won't know you're wearing them!

Quality of Life

These garments aim to help overcome some of the obstacles you may face after surgery. You can feel secure and confident, to be able to live your life to the full.

“Your experience is invaluable in helping others

Your own experiences with a family member living with a stoma are now invaluable to others needing guidance through a devastating period in their lives.. The design and quality of the products are first class, as is the service. Thank you again for your kindness and consideration ” B. F.

WHICH SUPPORT LEVEL?

Level 1 - Light Support Wear

This is the everyday light support range. Designed to replace regular underwear, gently hugging your body. The pressure will be noticeable compared to 'regular' non supportive underwear but not at all restrictive. After half an hour you'll forget you're wearing them, they are so comfortable. Useful for anyone wanting some gentle support either post surgically, or all day every day when living with a stoma.

Level 2 - Medium Support Wear

Medium support, can still be worn all day and so replaces regular underwear. This medium support is firmer and gives you a tighter hug than the Level 1 but is still not restrictive. The supportive area is double thickness fabric. Useful for supporting a hernia or for extra support during exercise or lifting.

Level 3 - Firm Support Wear

Firm support in the form of a belt with stabilising ribs to ensure an evenly spread pressure. This Level of support is designed to be worn for shorter periods as it's much firmer than Levels 1 or 2. Useful for supporting larger hernias, protecting hernia repairs or for giving essential support during strenuous exercise and heavy lifting.

PRESCRIPTION AVAILABILITY

Many of the products you see below are available on NHS prescription in the UK. You are entitled to apply for whatever you feel you need, but this does not guarantee your order. The relationship you have with your doctor or ostomy nurse will determine how much they understand your needs and therefore what they will prescribe. If you obtain your prescriptions through a prescription service such as Bladder and Bowel or Appliance Prescription Service then you must place your request directly with them.

New customers should try just a couple of garments to check fit and suitability before requesting more on prescription. If you have already tried Comfizz and you know what you want there's no need to place a small order. Just go ahead and request what you need. Most GP's are happy to prescribe up to 6 garments a year.

If you need a little bit of help and support, why not book a free one-to-one consultation with one of our experts?

Look for this symbol next to a product which shows the garment is available on prescription in the UK.

To request a garment on prescription you can either do one of the following;

- Use the prescription request form at the back of this catalogue
You can use the table at the back of this brochure to note down products of interest before calling the Comfizz support team
- Call our office and place your request over the phone Tel: 0113 266 2096
- Take this catalogue to your GP or nurse to discuss your requirements
- Use the website comfizz.com

Simply add your products to cart and select **Order On Prescription** on the cart page. Your garments should arrive within 3 weeks, often sooner. There is no charge to you.

Available to purchase

If you prefer to buy your support wear you can do so at www.comfizz.com Or telephone 0113 266 2096
You can use the table at the end of this brochure to note down products of interest before calling the Comfizz support team.

**CUSTOMER
SERVICE**

For help or advice
contact our
friendly team

telephone:

0113 266 2096

email:

info@comfizz.com

Once you leave hospital to move on with your life after surgery you may find with time you have questions, may developed issues you would like help with. Book your private 30 min appointment with one of our team to discuss options and any issues you might have. If we can't help you, or anything more in depth that can't be answered, then we would arrange a separate appointment with a nurse as it would need to be fitted in with their schedule. Plus if you wish to have a fitting and discuss your support wear needs we can include that service too.

<https://comfizz.com/pages/book-a-consultation>

We have 'clinics' at various UK locations but during the 'Covid restrictions' all appointments will be via phone or Zoom.

SELECTING THE CORRECT SIZE

Size Guides - Levels **1** & **2**

Note: There is flexibility in sizing and the ultimate decision will depend on personal preference for more or less support.

Comfizz Size	Dress Size	Waist Inches
Junior XS		14" - 16"
Junior S		17" - 19"
Junior M		20" - 22"
Junior L		23" - 25"
S/M	8/10/12	28" - 32"
M/L	14/16/18	34" - 38"
L/XL	20/22/24	40" - 44"
XL/2XL	26/28/30	46" - 50"
2XL/3XL	32/34/36	52" - 56"

Size Guides - Level **3** and other products

Measuring for a Level 3 Belt

To determine the size required use a tape measure around your waist but in line with the stoma.

If herniated – lie on your back and wait 5 minutes for hernia to relax before measuring.

For non-herniated situation – Remain standing, measure in line with the stoma site.

* If the measurement falls between sizes, order the size up.

Comfizz Size	Waist
M	32" - 34"
L	36" - 38"
XL	40" - 42"
2XL	44" - 46"
3XL	48" - 50"
4XL	52" - 54"

Measuring guide for aperture

Fold back plastic flange to where it's attached to the cloth bag.

Measure from one side to the other, this will be the aperture size you require.

Note: if your size falls between two sizes, always choose the larger size.

Comfisleeve

These measurements are taken at the widest point of the calf / thigh. customers are advised to use the guide to help them find a comfortable fit.

Comfisleeve	XS	S	M	L	XL	2XL	3XL
Calf	10" - 12"	13" - 15"	16" - 18"	19" - 21"	22" - 24"	25" - 27"	28" - 30"
Thigh	17" - 19"	20" - 21"	22" - 23"	24" - 25"	26" - 28"	29" - 31"	32" - 34"

FAQs

WILL COMFIZZ GARMENTS RESTRICT THE FLOW OF MY STOMA?

No, Comfizz will provide light support, helping to hold the weight of your bag as it fills without restricting the flow in any way.

WHY IS THERE NO FLY HOLE IN THE BOXERS?

Any opening will present a weak point and the garment will lose its' support element. You can stretch the leg opening.

IS THERE A POCKET INSIDE?

No, restricting the bag within a pocket can restrict freedom of movement which this fabric allows.

WILL THEY MAKE ME SWEAT?

The fabric is breathable and will allow moisture to escape, leaving you dry and comfortable.

HOW LONG IS IT SAFE FOR ME TO WEAR THEM?

All day and can be worn through the night as well to keep bag secure if required.

WILL THEY SUPPORT MY HERNIA?

Can give light support to small hernias, but for strenuous activity or for larger hernias it is recommended you wear heavier support.

WILL THE WAISTBAND ROLL UP?

No if positioned above crease of leg, and correct size is worn. (Too small, may roll)

CAN THEY BE WORN FOR SWIMMING?

Yes you can either choose our specially designed swimwear garments or use your light or medium support garment underneath your regular swimwear. Please note this fabric is not Chlorine resistant and so prolonged use in Chlorinated pools will shorten the life of the garment.

CAN I CUT A HOLE IN THE FRONT FOR THE BAG TO COME THROUGH?

No, any opening will present a weak point and the garment will lose its support element.

FAQs continued

DO I WEAR THEM OVER OR UNDER MY STOMA?

All garments are high waisted, designed to sit over the stoma site.

CAN I BUY MORE GARMENTS IF I'VE HAD MY PRESCRIPTION QUOTA?

Yes, simply purchase via our online shop or contact us with your order.

STILL HAVE A QUESTION?

Contact us and we'll be happy to help!

BENEFITS & FEATURES

Comfizz support wear Levels 1 & 2

- ✓ Virtually seamless garments so no pressing seams to dig into skin
- ✓ Breathable fabric allows sweat to wick away keeping you cool, dry & comfortable
- ✓ No internal labels to itch or irritate
- ✓ Cover and support an ostomy pouch, helping to smooth the outline and hold it securely in place, reducing potential leaks
- ✓ Cover and support surgical wound site
- ✓ Can relieve some hernia symptoms by supporting the hernia
- ✓ Improve body shape and self confidence
- ✓ Provide flexible comfortable support for sporting activities

Don't feel different feel **CONFIDENT..**

LEVEL 1 LIGHT **SUPPORT WEAR**

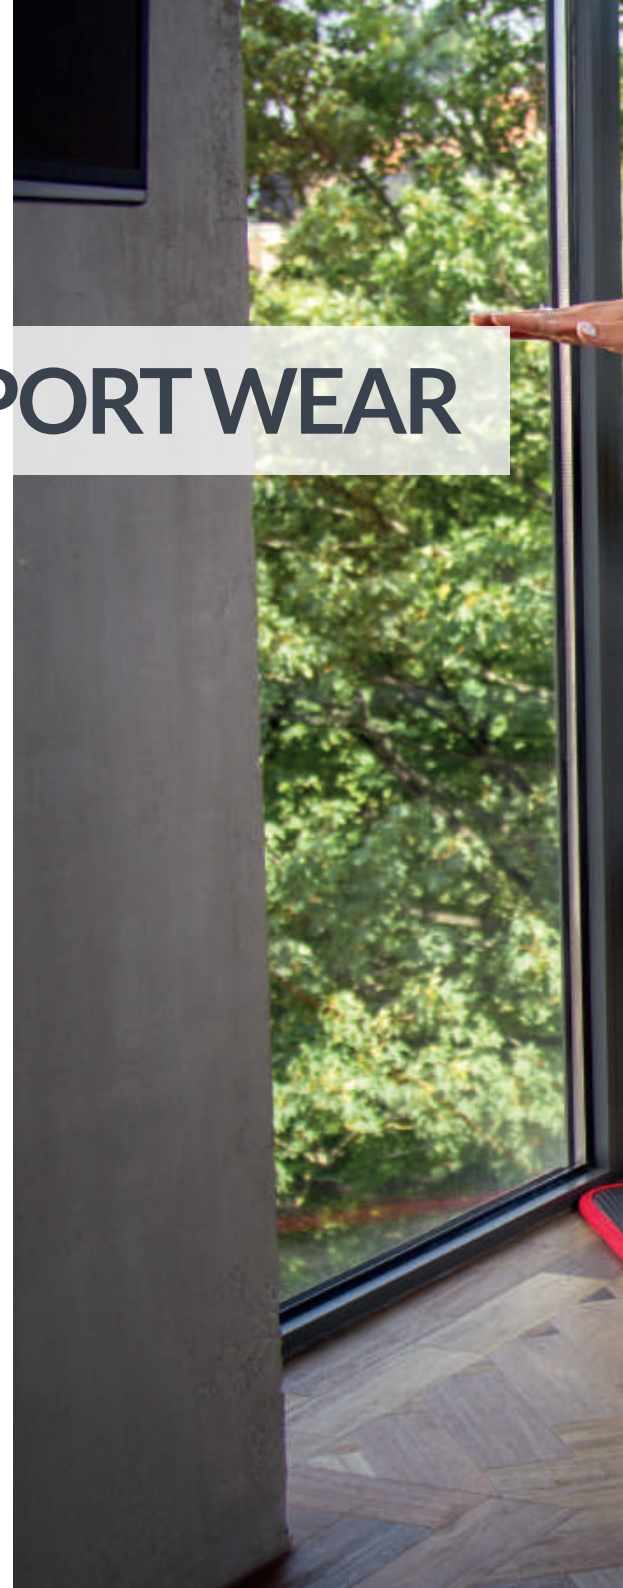

This is the everyday light support range. Designed to replace regular underwear, gently hugging your body. The pressure will be noticeable compared to 'regular' non-supportive underwear but not at all restrictive.

After half an hour you'll forget you're wearing them, they are so comfortable. Useful for anyone wanting some gentle support post surgically, or all day every day when living with a stoma.

“Waistband - It's brilliant... no drag down feeling anymore

Hi. I received the 10" wrap yesterday and I am wearing it today. I have to say it's brilliant. Good support and no roll down or skin pinching. Just what I needed as I am a new ostomate and don't like the drag down feeling I get with my bag sometimes. Also I am paranoid of a potential hernia. ”

Love it. Well done!

Women's **SUPPORT VEST**

Available to purchase
Available on prescription

Level 1 - Light support wear

A seamless figure hugging vest you'll feel great in. With adjustable straps for a perfect fit. The vest covers and secures a larger torso area than underwear and it's longer length prevents riding up.

Level 1 - Light support wear

The light support boxers (for both men & women) are designed to seamlessly hug and support the abdomen.

Note the unisex design has no flyhole to compromise on support. They are non medical looking and can replace regular underwear.

Available in high waist which is suitable to cover a high sited stoma or surgical site. Also standard waist for lower sited stomas or surgical sites or less tall people who find the high waist sits too high up.

The short leg of the boxer can be useful in keeping the lower part of the ostomy pouch concealed.

“Boxers far superior to others tried

First class service. I am delighted with both the fit and quality of the boxers and would add that I feel that these boxers are far superior to others purchased from different suppliers previously.”

J.K. Love it!

SUPPORT WAISTBANDS

Level 1 - Light support wear

A seamless stretchy tube. Just step in, pull up and position where it's needed in order to conceal and support a stoma or surgical site.

The waistband is a versatile support garment used in various situations where light support or concealment & discretion are required, such as during intimacy, when changing in public changing rooms, for sporting activities, and overnight for peace of mind. It can even be worn under swimwear for that extra layer of support. The **“Stay Put”** silicone on the inside helps prevent any movement or rolling of the waistband. Original version without silicone also still available.

For everyday use most customers use the 10” depth waistband. there is also a 7” depth available which is useful when less coverage is required or for less tall people who find the 10” too deep.

Available to purchase

“ I have been using your products for quite a few years now,

I find Comfizz very supportive and like a second skin but with the knowledge that if anything goes wrong with the bag I have enough time to get things sorted! I do Personal Training and can trust the pants to hold the bag in place and not worry about it. ”

L May

UNISEX SUPPORT BOXER

Available to purchase
Available on prescription

Level 2 - Medium support wear

The medium firm support boxers (for both men & women) offer more support than the lighter level 1 garments. Ideal for exercise or managing hernia symptoms. Soft seamless support wear, designed to replace regular underwear. These garments can be worn all day without restricting the stoma. Note the Unisex design (no flyhole to compromise on support).

They are non medical looking and can replace regular underwear. The short leg of the boxer can be useful in keeping the lower part of the ostomy pouch concealed.

“No more leaks

Using barrier cream for my rash meant my bag never stuck as well so had to change it every day. I've tried everything but to no avail until I came across Comfizz level 2 support boxers combined with the level 1 support vest.

The difference is amazing, fabulously comfortable garments hold the bag securely until it eventually sticks and will last 3 days again, no more leaks and they look great too. Well done Comfizz, don't know what I'd have done without you.” EM

Level 2 - Medium support wear

Firmer than the Level 1 Brief for anyone wanting more support. Ideal for exercise or managing hernia symptoms. Soft seamless support designed to replace regular underwear. These garments can be worn all day without restricting the stoma. They are non medical looking and can replace regular underwear.

“Don't know how I managed without them

Very BIG thank you to all the staff for being so kind, thoughtful and caring. I love my Comfizz briefs and don't know how I ever managed without them, makes me feel so comfortable and confident.”

B. Hussel

UNISEX DOUBLE LAYER SUPPORT WAISTBAND

Level 2 - Medium support wear

The double layered waistband is a seamless stretchy tube, making it a very versatile support garment, ideal for concealing & supporting ostomy and surgical sites. Designed to be worn all day, without restricting the flow of a stoma.

This medium firm support garment is in effect like wearing two level 1 waistbands. Despite its firmer level of support, the clever design makes it very easy to put on (step in, pull up, fold over). It's ideal for situations that require a little more support, such as during exercise, manual work or managing a hernia. The **“Stay Put”** silicone on the inside helps prevent any movement or rolling of the waistband.

Suitable for

- ✓ Post surgery support
- ✓ Ostomy support
- ✓ Medium hernia support
- ✓ Exercise support

THREE EASY STEPS

Available to purchase
Available on prescription

“Makes my ostomy almost invisible,
I absolutely love my waistbands, and vests. Your products allow me to still feel feminine, and at the same time make my ostomy almost invisible while providing such comfy support. I live in Canada, but wouldn't order from anywhere else! Thank you for making life comfier and a wee bit easier ”

Melissa Johnston

1 - Step in

2 - Pull up

3 - Fold down

The “Stay Put” silicone on the inside helps prevent any movement or rolling of the waistband.

UNISEX DOUBLE LAYER SUPPORT BOXER

Level 2 - Medium support wear

A unique specialised high waist support boxer designed to cover and conceal one or two stomas by sandwiching within a double layer in order to keep the bag from contact with your skin.

Your ostomy bags pull through a choice of openings to suit most positions of ostomies. The second layer (like a waistband) then comes over the bag to conceal and secure it, offering extra support. These garments can be worn all day without restricting the stoma. Note the Unisex design (no fly-hole to compromise on support).

Suitable for

- ✓ Post surgery support
- ✓ Ostomy support
- ✓ Medium hernia support
- ✓ Exercise support
- ✓ Continence pad support

DOUBLE LAYERED BOXER

Size S/M | M/L | L/XL | XL/2XL | 2XL/3XL

Colour

Fibre 57% Coolmax 31% Polyamide, 12% Lycra

SPECIAL FEATURES

Available to purchase
Available on prescription

No more chafing or discomfort from ostomy bag taps or clips, as the pouch is sandwiched between the two layers.

Hold or conceal one or two stoma bags with ease. Multiple openings to suit any stoma, whether left or right, high or low.

Support waistband layer front and back

Mesh pattern next to skin for cool comfort where warm bag sits.

LEVEL 3 FIRM **SUPPORT WEAR**

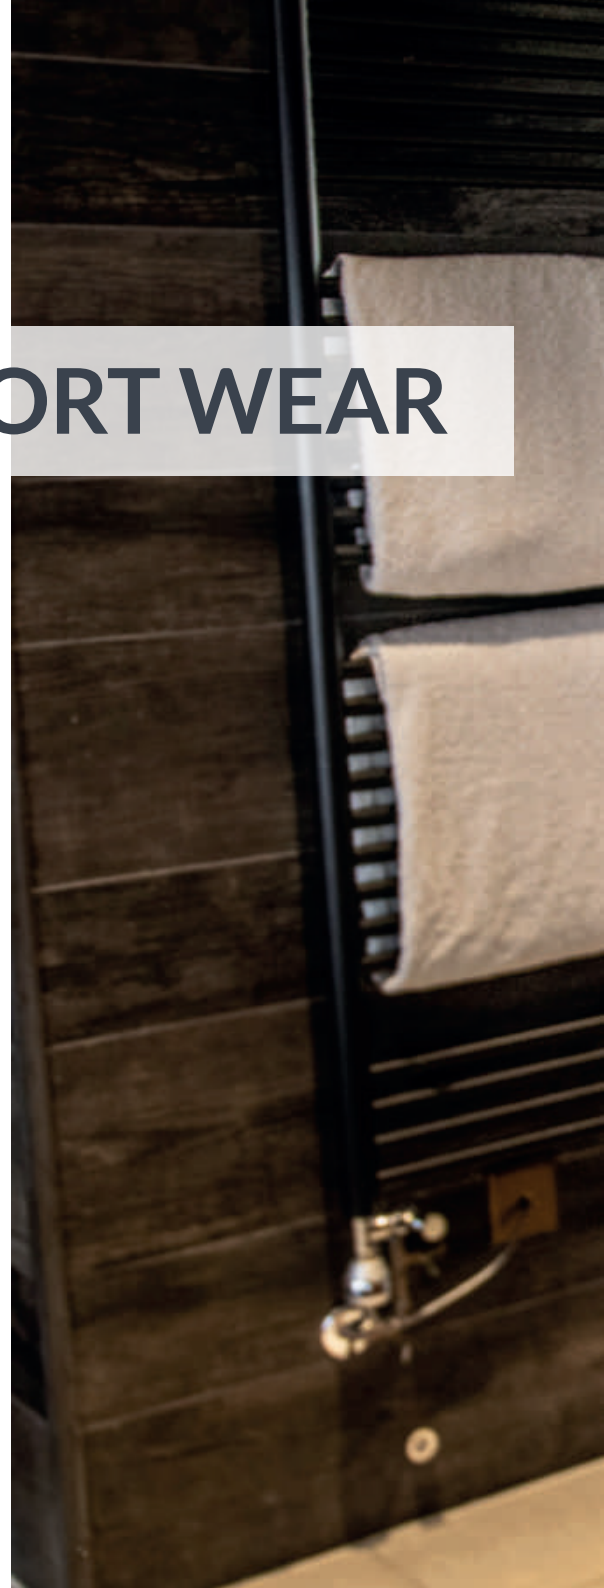

Firm support in the form of a belt with stabilising ribs to ensure an even spread of pressure. This level of support is designed to be worn for shorter periods as it's much firmer than Levels 1 or 2.

Useful for supporting larger hernias, protecting hernia repairs or for giving essential support during strenuous exercise and heavy lifting.

**PREMIUM QUALITY
FABRIC & DESIGN**

**COMFORTABLE FIRM
SUPPORT**

“ Wish I'd had it ages ago

Just received delivery of level 3 support belt and protector.

Had it on all day to support my hernia. Wish I'd had ages ago it is so comfy and gently supportive. I've got more confidence to perform daily tasks now. Thanks so much. ”

L McGlashon

UNISEX TWO PIECE SUPPORT BELT

Level 3 - Firm support wear

This firm-Level 3 belt was designed as a comfortable, cost-effective and hygienic way to achieve firm support.

Note that the belt comes with two front panels but extra front panels can be purchased separately, as well as an optional stoma protector which simply velcros onto the front of the belt.

Hygienic

It is the front part of a belt that is likely to get soiled requiring the whole belt to then be washed or replaced. The TP (Two Piece) belt by Comfizz deals with this issue by using a simple easy to replace, easy to wash front panel.

Cost effective

The TP set comes with two front panels meaning in effect two level 3 belts as the wearer can refresh the front panels frequently without the need for two complete Level 3 belts.

Comfortable

The TP belt is constructed with flexible firm fabric with high air permeability and wicking properties making it soft next to the skin and breathable, thereby minimising discomfort through sweat.

Stoma protector with velcro strips

Size One size fits all

Colour

Fibre ABS Plastic
Nylon 15%

The protector offers additional protection against pressures or unwanted forces onto the stoma site, for example during certain sporting activities. The protector can also prevent seat belt pressure on long journeys. This is a useful optional extra.

NOTE: The protector can only be used in conjunction with the level 3 belt or with the Comfishield.

“ Brilliant and works perfectly

This appliance is brilliant and works perfectly. I'm now able to sleep on either side, without pressure being placed on my bag. Brilliant! I would highly recommend the Comfishield set to anyone - especially for a peaceful sleep. ”

Mrs P Brown

EASY CUT SUPPORT BELT

Available to purchase
Available on prescription

Level 3 - Firm support wear

This is a firm level 3 support belt, suitable for anyone with a stoma or parastomal hernia. The advantage being is you can customise the belt to perfectly suit the position of your stoma by cutting the hole yourself.

Hernia Prevention

- These garments can be worn all day, every day but it's particularly important to use them during any strenuous activities such as lifting, exercising, or gardening etc to help PREVENT a hernia.
- Also provides essential support for weakened abdominal muscles during periods of coughing, sneezing or vomiting, all of which put tremendous pressure on your abdominal wall.

Hernia Management

- For anyone who already has a hernia, this belt provides essential support helping to manage the symptoms.

15cm deep belt shown above

Easy Cut Belt 15cm

Size M | L | XL | 2XL | 3XL | 4XL

Colour

Fibre 55% Polyester
15% Polyamide
10% Elastan
10% Viscose
5% Other

Suitable for

- ✓ Post surgery support
- ✓ Firm hernia support
- ✓ Exercise support
- ✓ Back support

22.5 cm deep belt shown above.

This belt is tapered to follow body shape and comes in two options for left or right sited stomas. NOTE: 15cm belt fits any stoma site.

CUTTING INSTRUCTIONS

measure opening

1

To measure the cutting hole, fold bag flange back to where it's attached to the fabric and measure across.

2

Pop out centre of the template and position over centre mark. Select opening size and draw cut marks onto belt.

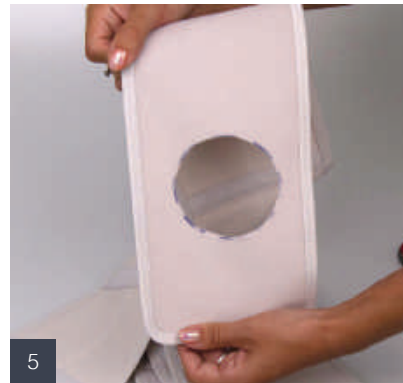

3

Fold belt and nip small cut to be able to insert scissors. The fabric is specifically designed not to fray.

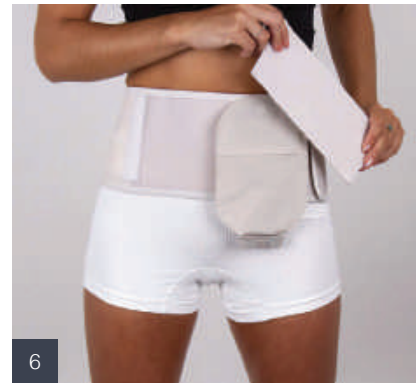

4

Follow the guidelines and cut round.

5

Now the hole is cut, place the belt with the hole positioned over the stoma site and pull the bag through.

6

Use the separate stretch prolapse cover to Velcro in place and pull over the exposed bag.

NOTE: an optional stoma protector is available with this belt see page 32

UNISEX SUPPORT BELTS

Available to purchase
Available on prescription

Level 3 - Firm support wear

This Level 3 belt provides firm support with built in stabilising ribs to prevent wrinkling.

Ideal for managing a hernia or for use during strenuous exercise & heavy lifting. Available with aperture to pull ostomy bag through or without aperture for those who irrigate or don't have a stoma.

Belts with an aperture also have a built in prolapse cover to reinstate support over the stoma bag without restricting flow.

Multi Support Belt 15cm & 20cm deep (no aperture) 15cm shown

With no aperture this model is ideal for those who irrigate and so don't use a bag or those who don't have a stoma but do have an incisional hernia which requires support.

Measuring for a Level 3 Belt

To determine the size required, use a tape measure around your waist but in line with the stoma.

If herniated – lie on your back and wait 5 minutes for the hernia to relax before measuring. For non-herniated situation remain standing, measure in line with the stoma site.

NOTE: If the measurement falls between sizes, order the size up.

Measuring for the aperture

Fold flange back to where it's attached to the fabric, measure from there.

Aperture sizes
60mm 72mm 85mm

COMFISHIELD SET STOMA PROTECTION

Available to purchase
Available on prescription

Ostomy protection from unwanted forces

Protect your stoma comfortably with the versatile simple to use Comfishield. It's a two-piece set with a soft back pad that fits snugly behind your stoma bag ready to take the semi-rigid polymer protector, which velcro on.

- ✓ Protection from seatbelts, dogs, young children, contact sports etc
- ✓ Easy to fit, wash and wear with any clothes, any time, any place.

Many thanks,
M Johnston

JUNIOR **SUPPORT WEAR**

“ If you want your children to be intelligent, read them fairy tales.

If you want them to be more intelligent, read them more fairy tales. ”

Albert Einstein

JUNIOR SUPPORT VEST

Level 1 - Light support wear

Stylish junior vests designed to cover a multitude of procedures for children. Seamless with no internal irritating labels and breathable fabric with two way stretch makes these garments extremely comfortable. Girls tank top style with pretty straps or sporty base layer style, either way the support provided will allow total freedom of movement while neatly securing everything safely away from view. Also for the very young the vests will keep away curious little hands.

Suitable for

- ✓ A.C.E
- ✓ Gastrostomy
- ✓ Ostomy support
- ✓ Post surgery support
- ✓ Exercise support

JUNIOR SUPPORT BOXERS & BRIEFS

£

Available to purchase
Available on prescription

High waist

High waist

Level 1 - Light support wear

High waist panty style briefs for girls and short leg boxers for boys. Designed to sit up and over the stoma, ACE site, or gastrostomy, concealing and supporting the appliance.

Soft seamless support designed to replace regular underwear. These garments can be worn all day and night if needed without restricting the stoma.

Comfortable gentle support is ideal for that extra security during activities and concealment, particularly in school changing rooms.

Suitable for

- ✓ A.C.E
- ✓ Gastrostomy
- ✓ Ostomy support
- ✓ Continence pad support
- ✓ Post surgery support
- ✓ Exercise support

JUNIOR SUPPORT WAISTBAND

Available to purchase
Available on prescription

Level 1 - Light support wear

A seamless stretchy tube, just step in, pull up and position where it's needed in order to conceal and support the stoma. Great for allowing youngsters to get on with life without feeling too self conscious of their stoma or ACE site. Gives the freedom to wear any fashion with discretion and confidence.

85% Polyamide
15% Elastane

Suitable for

- ✓ Post surgery support
- ✓ Ostomy support
- ✓ Light hernia support
- ✓ Exercise support

“She can now
run around
care free

We are both so pleased
with it.

Customer service was
brilliant and my daughter
is so happy she can now
run about without her
bag flapping around all
over the place.

Can't wait to put another
order in with you soon.”

Rebecca Martin

PURCHASE ONLY PRODUCTS

www.comfizz.com

The following section of the catalogue contains products freely available to purchase but which are **not yet available on prescription**

COMFISLEEVE Urine bag suspensory system

A leg bag fixation solution designed to hold most types of disposable & reusable urine bags. This double layer sleeve with two-way stretch, evenly distributes the tension required to hold the bag in place and internal silicone keeps the sleeve securely in place. It performs much better than the two strap system, leaving no pressure marks. The Comfishield discreetly hides the bag and is extremely comfortable due to breathable fabric, two-way stretch and tap opening access.

This durable long lasting garment offers excellent value, compared to the more disposable alternatives.

Available to fit calf or thigh depending on personal preference.

- ✓ Exercise support

Swimmwear

Size S/M | M/L | L/XL | XL/2XL | 2XL/3XL

Colour

Fibre 89% Polyamide
9% Lycra
2% Cotton gusset

Level 2 - Medium support wear

The high waist design will sit over and above your stoma, discreetly hiding it from view. The two-way stretch fabric will provide gentle compression which is essential in supporting the muscles around the vulnerable stoma/surgical site from herniating as well as holding the bag securely in place for your extra confidence.

The inner mesh lining allows the ostomy bag to be securely sandwiched between the two layers.

BREATHABLE MULTI-STRIPE SUPPORT BELT

Available to
purchase

Level 3 - Firm support wear

Made of ribbed fabric, with internal cotton towel lining. The belt has easy velcro fastening to ensure a snug fit for maximum support.

These belts have been designed to help protect the abdomen, stomach, kidneys and back after medical surgery. The belts can also be useful following child-birth, for extra support during exercise or for abdominal hernia support
